

KEEP YOUR FACILITY SAFE, CLEAN, AND HEALTHY

SAFE. CLEAN.

Gaining consumer confidence of safety will be critical to our economic recovery

Using the Bac-Track system, facilities can be viewed from one dashboard and trends can be visualized.

Tracking bacteria and virus levels on surfaces could be critical in determining potential cross-contamination scenarios.

We bring a systematic approach to help prevent the spread of germs using: ATP monitoring, advanced

electrostatic sprayers, cloud-based Bac-Track software and training:

- Build consumer confidence that they are in a safe environment.
- Protecting groups of people as capacity gets back to normal.
- Lowering the risk of COVID-19 for the general public and employees.

- Confirms effectiveness of current cleaning techniques.
- Tracking potential environmental threats including pathogen mapping features.

1

TEST

Our Bac-Track ATP reader is the most advanced ATP System on the market today. It provides sanitation verification for immediate, quantifiable measurements of environment and high-touch surface cleanliness.

2

TREAT

We provide the latest products and solutions designed specifically for facility managers. This includes the EMIST EPIX360 electrostatic sprayers - the most effective handheld, cordless electrostatic disinfectant sprayers in the world. More coverage. Less waste. Better results.

3

TRACK

Our proprietary software, Bac-Track, monitors contamination levels in an easy-to-read dashboard dedicated to your facility. It also allows you to monitor by department or equipment category to pinpoint your problem areas. Our software includes infection control reporting to meet new CMS § Reg 483.80 – F880 guidelines and CDC reporting requirements.

4

TRAIN

We offer onsite and online support and training that will assist in your fight against germs. Our software features “Ask Eddy,” a virtual intuitive assistant.

BAC-TRACK: CONNECTS ALL FACILITIES
